I once had the home theater set up in the living room because it was an ideal space at that point in time. Later on, I opted to have a separate dedicated room. It may not have the traditional look but we are slowly getting there. I am thinking of adding more furniture and applying lighter colors to the walls.

What else should I add in order to make it multipurpose in nature?

Having that ideal space is something I have had in mind for a long time since having the set up in the living room can be quite limiting at times. Adding more furniture and applying lighter colors to the walls, is a good place to start.

For a long time, I have been considering this while also wondering what the best size for a home theater room would be. I think that you can create a special dedicated room, for a decent amount.

Kitchen items and a dog trained to open the fridge to fetch the beer and chips. :lol:

If you have the room, get a ping-pong table. They fold in half when not in use.

A nice home stereo system for music, podcasts, and audiobooks would be nice. I'd add a screen

of some sort to block out any extra light when watching a movie on the projector.

I say recliners! Add recliners, add a new surround sound setup too. I'd toss in beanbags for the kid's too. I think it would be cool to have a little reading nook in the corner too.

I've seen some amazing DIY projects where the TV and audio systems were hidden back in the wall. It was unobtrusive when you weren't actively using it and easy to use when you wanted to see a movie or listen to music. I'm not handy enough to pull that off myself, but I thought it looked neat.

I actually built something like that, unfortunately I found the extra design work and construction to be pretty useless if you're hiding things that you use on a daily basis. It's a neat concept and everyone seems impressed once they experience the big reveal, but we hardly ever hide our devices because we use them all the time. The sat radio, speakers, and TV firmly remain in the out position. I wish I'd had the forethought to think about that before I spent time and money on it.
