All, I'm downsizing for a time and offering my original attempt at 7-Pi mid-horns + HF horn boxes for the cost of shipping. The mid-horn dimensions aren't exact, but close, and they aren't living room presentable, but have been a good friend to me for many years. I'd intended to coat them in truck bed liner to match the bass bins I had.

Originally, these were built to house Altec 811 horns because I love the look, hence the size. At the moment, there's a panel added with a cutout for Wayne's 290C horns. I'd be willing to sell the Altec horns + 806-A drivers for \$200 for the pair. Those I got brand new in sealed boxes years ago, so they are in great condition.

Thx, Chris
