Dear Wayne

I'm evaluating the buying of 1PI speakers. In order to evaluate their placement in my room I need dimensions. I can't find their dimensions on website, actually for none of the PI models.

Thanks in advance,
Alvise

Dimensions of the one Pi model are 18"x12"x8".

You can find dimensions and other information at the link below.

Specs & Prices Beside each model is an icon that looks like a whitepaper. Click on that for acoustic measurements.
