I have an old Thermionic 3 speaker with the PSD2002 compression driver and would like to change this driver to an DE250 B&C.

My question is, which crossover parts I have to change.

Thank you very much

Frank

It'll swap right over. But change the R1/R2 parts to reduce the tweeter 2dB. See the following chart for values:

R1/R2 Values

Hello Wayne,

Thank you very much for the resistor chart.

What is about the capacitor? Is it required for the DE250?

Frank

You won't need to change the capacitor unless you upgrade the radial horn to our H290C

Wayne,

Thanks for your support.

Frank
