Subject: How to fasten R11/13?

Getting closer to completing my 4pis, and have a roll of unfaced R11 on the way. I searched, but was unable to find information regarding a good method for fastening the insulation in place. Maybe because it's so obvious, no one's needed to ask :)

Any help is greatly appreciated.

Remove the paper vapor barrier and glue the sheets in place with white glue. Just run a bead on the insulation and press it into place.

Thanks, Wayne. And I got lucky; I found a source for fiberglass R11, unfaced, so no messing around removing the paper. Hopefully the binder and recycled content aren't an issue (functionally speaking).

R11 @ Menards
