I have a pair of JBL LE15A 8ohm drivers. Wondering if the would work in any of your BR designs?
Thanks,
Jason

Sorry, no. The only JBL midwoofer used in any of our designs is the JBL 2226H. I love their drivers, and in the past I've used various 22xx series models such as the 2205, 2105, 2115, 2426, 2241, 2242 and 2245. But right now, it's just the 2226.
