Subject: Which 4PI?

Hi everyone. Here's a theoretical question. Which 4PI speaker version  has the best low frequency response. I currently use a 3PI that's old, basic, but a very good speaker. I don't want to build a pair of subs. The speakers will get moved around from the living room to the garage, or even out by the pool. Your suggestions please. Thanks.

steve

All versions have basically the same bass response.  The difference is that the upgraded model has reduced distortion because the midwoofer uses a shorting ring.
