Anyone here who have setup their Polk soundbar with a Samsung TV plus an external sub? Tips on getting the best setup? Any tips will be appreciated. Thanks!

Don't have the Polk soundbar personally, but my brother does and I help him set it up. From what I know, the soundbar has HDMI and your TV likely does too, so go with that for the best results. Just find the correct ports. This could help if you need a little more detail. Enjoy!https://theproductanalyst.com/soundbar/polk-setup/

Just to add, I have a thing about remembering what is associated with the HDMI 1, 2, and 3 port options. I have to write them down sometimes.
