Dampening fluid has leaked from my NAD 5120 turntable (early 1990s model) during interstate transport. I've looked everywhere in Australia for more. Can't find any. Does anybody know where I can find some? What is the right viscosity for this particular dampening fluid? Appreciate any advice. Thanks. Stuart G.

Good question. But even if you get the oil, how will you fill and seal the damper cylinder? Is it serviceable, or should it maybe be replaced as a unit?
