I'm a fan of Sex and the City, so I was happy to hear about the revival in the works. There's one big catch though - no Samantha. I'm sorry, but you can't have Sex and the City without Samantha. Samantha was the sex! I wonder what happened? Do you think the show will be successful without her?

I did see that news and I was surprised but then again not surprised. A lot of actors and actresses that were original don't come back. I am not interested in watching the new show without Samantha! Then again, I've matured and my taste in shows has changed so I probably wouldn't watch it if she was back.
