One of my goals for 2021 is to read more, so I'd like to read a few memoirs from musicians. Does anyone have a favorite memoir that I should check out? I'm not picky about artist or genre. :)

I didn't expect much from Eminem's memoir, but *The Way I Am* is truly an excellent read and worth delving into if you're into rap. Another good one is B.B. King's autobiography, *Blues All Around Me*.

Thank you so much for the suggestions! I'll look into both of them. I'm not a huge fan Eminem's music. But, who knows? Maybe his memoir will convince me to give his music another chance! :)

In October, Dave Grohl is publishing a memoir called *The Storyteller*. I'm really excited for this one and I'm planning to preorder it. Maybe add this one to your list and read it when it comes out?

Keith Richards' *"Life"* is good. I read it years ago, and even back then the public library had it. Nothing like reading a great book for free.

This one sounds really good! I'm a fan of The Rolling Stones, so this one would be a good pick for me! (As a side note, I love the library. I wouldn't read nearly as much as I do without the library).

Never read one, and I just realized how deep their life would be, especially if they're the writer of their music too. I only know a lot of musicians also have to lead tough lives because starting is never easy. I look forward to reading one now.

Back in the 80's I read something that I think was an unofficial biography of Richards. A guy named Ton Sanchez wrote it, I believe. It was a good read, but maybe not the most accurate.

I haven't read one yet, but it's something to look forward to learning from because the music industry is challenging. Becoming a musician is a risk that not everyone pushes to continue. I can't imagine the hardships that they've experienced.

Whitney Houston got one, right? I'm interested in reading her story because it seems to be a heavy one. The music industry must've made it harder for other races to thrive, especially in the earlier years.
