Excited to begin my build. Could you send the Pi 4 plans? Also how narrow can I go? I know the internal space needs to be keep at a minimum the space called for in the plans but I would like the cabinets to be as narrow as possible.

Thanks

Wayne I would also like to study the Pi 7 plans.
Thanks again..

Please decide which model you prefer and let me know. I'll send plans when you've decided which model works best for you.

See the Pi Speakers FAQ for information to help you decide. It has information about differences between models and options and also has information about alterations and mods.

Thanks Wayne. My decision is based on outside dimensions. Is that information available for pi7?

The seven Pi model is two feet wide due to the midhorn. And while I appreciate the matter of size - if it doesn't fit, it doesn't fit - there is also the issue of feasibility and whether or not the corners

and room dimensions are suitable for constant-directivity cornerhorns.

I'm glad you're researching this. I'll bet you're going to put together an excellent system!

Hi!

Currently sitting on 6x JBL2226H and I'd like to try the 4pi build, may I request some plans?!
Thanks so much
