My parents bought a smart television finally. They bought a Samsung. Problem is their new TV doesn't have the port for the three cables on the Wii. I've looked for an adapter but can't find exactly what I am looking for. The Best Buy employees weren't helpful either. Anyone know anything about this?

I am pretty sure that they make an adapter that literally hooks up to those three cables. You plug the cables into the adapter and then into the hdmi port. Have you looked on Amazon?

Amazon has everything you need, and everything you never knew existed.

Just type what you need into the search bar along with the make, model and year of manufacture of the television. You should find it.
