A single issue was expensive but it was for the diy crowd. Discontinued but you can still get back issues. You can get all the issues on single USB stick for $99. What a deal.

Linear Audio is similar to Audio magazine and audioXpress magazine.

Hi, For those of you that might be good at both diy and writing up a project with photos on it AudioExpress likes to use them. I have done 8 so far. They even pay by the page. So if you fit that group....PM me and I will get you a POC there.
