Subject: Dual CS 503-1 running fast

Just bought a Dual CS 503-1 turntable from ebay. Works fine, but tending to run slightly fast. Had a look at, and cleaned, the belt and any bits it runs round to no avail. My simple mind tells me that a worn belt would tend to run slow. Any suggestions as to how I might fix this problem would be much appreciated.

It has a speed adjustment, although it is meant to be serviced by a technician and not the user so it isn't easy to get at. You might want to take it to the shop.
