Been looking into the 8 pi Speaker. Really cool design and checks a lot of the boxes on something I'd build. If I could get the plans that'd be great. Also got one question: are the kits listed on the website for a single speaker or for a pair? Can't seem to figure it out.

You've got mail!

Prices shown are for finished individual speakers and for kits. Each kit has the parts to build one loudspeaker.

copy of the plans. For larger speakers that incorporate a compression tweeter and crossover network, kits also include the crossover, Zobel woofer damper, and all cable assemblies are completed and ready to install. Every kit containing a compression driver also includes the horn flare and the bolts to mount the driver to the horn.
