Subject: Not Able To Extract Audio From Video

Greetings, I recently downloaded a video online. But I am having a problem extracting audio from video. I am not able to do this anyway. But after searching online I came across this guide. I am quite confused if this article might be helpful or not. Could someone please confirm if this is helpful in anyway? Any suggestions will be highly appreciated.

Yes, of course. Those suggestions will work just fine.

+1. I have used VLC and Audacity for many things and both are fine.

VLC is the one that I've always made use of as well. I've never had any complaints since I started making use of it.
