Hi Wayne,

Thanks for publishing so much information on your speakers.

Please could you send me the plans for the 4 Pi speaker and 3 Pi subwoofer?

When buying kits, are the prices per speaker or pair for the 4 Pi speaker?

I live in the UK so assume shipping costs for the flat pack kits will be very expensive, is shipping more reasonable for the driver, wave guides and crossover kits?

Thanks again!

Michael

You've got mail!

Kits have the parts to build one speaker, so for stereo, buy two kits.

Or maybe better yet, find all the drivers locally and buy only the waveguides from us. That will save money in shipping costs.

We also sell crossover boards individually, either populated or unpopulated. It's nice to have the parts mounted on a PCB.

Perfect! Thanks for the information. Very useful. I'll look into the drivers.

All the best,  
Michael
