Maybe just a diversion for Wayne in case it helps. Guy reversed the 2k1 smartwatch (with code on github) - 59×16 screen -- 10 characters by 2 characters

https://oldvcr.blogspot.com/2024/01/reversing-web-nywhere-watch-browse.html

Maybe not old enough for ya, but the spirit is there and the guy did the respectable geek-dive! Best to all!

Thanks for the link - that looks pretty cool.

I'm still pretty active in both the bleeding edge and retrocomputing worlds. On the modern side, I do Spring Boot 3.2 and the OpenAI API. In the retrocomputing world, I do a lot with Altairs sporting the Intel 8080 and Syms which are 6502 family systems, much like the Apple II.

Very cool--makes me smile, man. Don't know where you find the time and energy but glad you still do! Thought, if nothing else, the sidebars would have something to keep you from getting work done :)
