Hey.I was wondering where I could get a really cheap CD turntable, that doesn't have any special functions, just basic turntabling functions. It would be used for cutting and scratching. The reason I'd like to find one is because I just bought a turntable (a Technics SL-BD10), and it does a really bad job at scratching. It skips every time I put my hand on the record!Thanks!

Not many scratchers hang out here. This place is mostly for audiophiles.
