waveguides and a pair of the crossover pcb's.

Does anyone have an idea of how to do it without it costing more than double the item value in postage?

I recommend using a freight forwarder. They will provide a USA address, which you will then use in the Pi Speakers cart, by entering the address they give you. This will make your shipping costs much lower. Do a search on the internet to find out what freight-forwarding companies are available to you in your area.
