Hi all you pro audio folks a friend asked me to "fix" his S600. The only schematic I see on the web is rather fuzzy so it makes this difficult. Does anyone have a clean schematic for this critter. Thanks

At the last Lone Star Audiofest, there was a company called "Wizard Sounds" that did repairs. They looked like they got their hands into just about everything.

You might reach out to them and see if they know anywhere to get that schematic.

Hi Wayne, thanks. I finally got a schematic from another diyer. Pretty straight forward amp. It should be easy to figure out what is wrong.
