I am specifically talking about movies that were made in the 80s and 90s. There are a lot of these movies that were quite interesting and can still be relevant today. Do you still watch any of those older movies? Which one is your preferred movie that you can watch multiple times?

I do watch older movies but not all the time. Whenever I'm watching older movies, I'm doing it to pass time and also learn what they did that the new era don't implement in this era. I don't have any specific movie name that I've watched multiple times and remembering movies name is so hard on me.

Snake in the Monkey's Shadow is one of the older movies that I've seen recently and it was really good watching such a movie.
