I was wondering if this older Zenith Model ET915 turntale/8 track/stereo player was worth anything, or I should put it out at the curb. I was given this as a gift, but so far I can only get the AM to function. Might be simple to fix, or expensive? Not sure of the year. Thanks for the advice...Jack

Stuff like that is fun for nostalgia, but they don't generally fetch big dollar amounts when sold. There are a few collectables, but most are not worth much money. They're interesting though!
