So I bought my Arcam DIVA CD and ampsetup with KEF speakers a couple of years ago, since then i have been spending my time with my band recording and have found ANALOUGE IS BETTER! I want to put my theory into practice and have aquired my dads thorens td160b mk11 and have bought am SME 111 tonearm that needs a cartridge, any recomendations under £50? I want to show my digital loving bass player that the table can out perform the cd, wht upgrades can i do to the deck to blow his nuts off? CheersTom
