I picked this up at a thrift store yesterday for $3. Everyting is in near perfect condition but it needs a new needle. There was no needle in it when purchased and I'm having a very hard time locating a picture or anyone who knows the right needle I need for this. Please if anyone can help it would be greatly appreciated.

Seems like most of those used Shure cartridges.  Look at the post just below by Jim Mayor, it may be helpful to you.  You might also try NeedleDoctor.com.
