Subject: Crown Tape recorders info? Posted by Grego on Wed, 09 Feb 2005 23:45:22 GMT View Forum Message <> Reply to Message

Hey cool forum, but it looks a little slow! I need to research an old Crown 2 track (no model name on front) I will take out tonight and get the info off the chassis. Jemah Services website seems to be gone. Are they still in biz? I also have a big Teac, a half dozen Roberts/Akai 770 type decks, an Otari 2track, a couple of Sony's, a Revox A77. I purchasedone of the Roberts new in 1967. Plus a bunch of Cassettes fromNak, Marantz, Tascam... and a couple of Tascam DAT machines. All my reel to reel stuff has been in storage for a while (except the otari). I have just taken it all out and am inthe process of getting things going again. I am also considering picking up an RT-909 for the living roomsystem. That's how I found this forum. Yeah, I guess I love tape Are there any other tape recorder forums or good resources? Thanks in advance.

I'd say it might be worth it to look around on StereoManuals.com, hopefully they can help you out.

If you are still interested I have Jemah's Snail and phone tucked away somewhere. I also have a Crown 22 800 up for bid to those who really want one rather than a reseller.
