I have a pair of KOSS Model 1 Electrostatic speakers. I don't know how to use them in my system. Do they need to be plugged in? They have no electrical plug anywhere on them.

Yes I hooked them to an amp and nothing happened. They are huge speakers and along with the two speaker wire connections there is a small round female connector on the back.

HI,I did some reasearch and they do need to be plugge into the wall. Also, they need a large amp, 100 WPC or more, able to handle varying loads...like a carver amp. -akhilesh
