I was wondering with everyone finally getting on board with the joys of 5.1 digital music....why is it hard to find any speaker covers that look like funtiure? I only know of one brand and they are making it specifically for their speakers. Does anyone know of a place where I can buy something like this? My setup is wall mounted Polk and wanted to know if I can buy something to cover them up on the wall without disrupting the sound.

I have Grille covers for my speakers but I mean I dont shop for covers like that. I lucked up on these covers through a friend and they seem to be the only ones I really see around.
