I am looking for a replacement for a midrange horn on my Kenwood MV-9D. Kenwood no longer supports the Speaker. Does anyone know where I can get a replacement? ThanksFrank

I'm not familiar with that speaker. Can you tell me more about the midrange driver, i.e. frequency response, sensitivity, etc? Can you post a picture of it? If so, I can probably help you locate a suitable replacement. With luck, you can find one that is a bolt-on repair part, meaning no modification to the cabinet or crossover is necessary. If not, you may have to do a little bit of modification. But I'm sure there are plenty of options for you.
