I went to a dealer and they had the Audio Physic Yara Evolution for sale for €1000,- (which is not bad i think). The thing is they said they preferred them over the Audio Physic Yara's. I decided to do some research on the net where, in the (few) reviews i found, the Evolution always came in second. So now i'm confused. Did any one by any chance give these 2 a comparative test? Thanks in advance.

If your dealer didn't sell both, I would forget it. If he did sell both I wonder what his commission was on each line. Maybe I'm just too cynical, but (before I started getting deaf) I would always trust my own ears over any dealer.-Dick
