Hi, I was wandering if anyone could tell me whether these speakers are any good? I have been offered a set for next to nothing, all be it they are a bit battered externally, and was wandering whether anyone could offer advice as to whether it is worth renovating them. As I said externally need sanding down and painting of boxes. Input terminals need replacing and they will be back to new. Anyone any idea how much they might be worth as they are and when they are restored? p.s the drivers and wiring are fine. Thanks for your help, I am new to all this.
