Hey, just wondering if anyone could suggest a speaker setup for me... I have a 15X17' livingroom, which is why I'm getting rid of my paradigms (Monitor 90P's V.4, CC-370 center and mini monitors in the rear). I am keeping my Denon receiver, but what speakers should i get? I need a set that hangs on the wall, front centers and rears, subwoofer. They still need to be powerfull but I'd take clarity and quality over loud. I've only got 2000 to spend on them, so what's my best bet?

If you're looking to mount on the wall, maybe put them in the wall?Everything but the subs, of course.
