
Subject: Anyone have good 35mm photos of the GPAF?

Even high quality digital cam photos will do. Derk shot several rolls of 35mm film of all of the rooms, and I was kind of counting on those but none of them turned out except the Locus Designs room. I took a bunch of pictures with a cheapie digital cam, but really intended those for just a way to get photos online fast during the weekend. I had hoped to replace or suppliment those images with high quality shots, so if any of you have photos of the entire event, please post them or make them available.

Thanks, Jim, I got 'em. I'm uploading them to the GPAF 2005 Photos directory right now. I'm also doing little write-ups of each of the rooms starting on the left of my room and going around the hotel. Maybe I can do a room every few hours or so, in between other stuff. Thanks for coming to the show, and special appreciation for making these photos available.
