evm12l specs :-<http://www.thielesmall.com/include/details.asp?ID=2668&dtype=1> and the rest
<http://www.thielesmall.com/database.asp> look at volvotreter's mid bass horns and also edgar show
horn in downloads section cheers gazza

They're fabulous drivers but be sure they are correct for your intended application. In a direct radiator box they are great guitar speakers or even hi-fi mid basses, but useless below 80 Hz. In a horn they can be good down to 30Hz or so, but it's going to take a big box (20 cu ft) to get that low. Edgar's Show Horn works down to about 50Hz, but the folding geometry limits the high end to 400 Hz and response is ragged; there are better choices.

WoW! Good looking horns! I think I've seen 'em before but still say wow. Thanks for the link too. It deserves a plug so I think I'll do that now.

Do you have a response chart of Edgar's Show Horn with EVM15L? Thanks in advance.
