Subject: JBL 2380 clones?

The latest Parts Express catalog shows two 2" throat horns that look like the JBL 2380. One is a Selenium horn, PE part #264-328 (page 211). The other is a Goldwood, PE part #270-204 (page 196). Anyone have any experience with these or can offer any info about them? Are they JBL clones? close copies? not close enough? Thanks.

Hi Floyd,Hopefully, someone will chime in with direct experience because mine is second hand. I use mostly Eminence and JBL parts. But there have been a lot of people tell me they really liked the Seleniums.Wayne
