They are out of my beer budget reach. But, I thought those here who can afford them may be interested in checking them out.A nice clone of the Tannoy Churchill would be nice, or an MLTL.Looking forward to anyones experiences with them.You will have to open up the Hemp Acoustics link and go to the appropriate pricing table.FYINorris

At LSAF, I noticed the Audio Note woofers were blue. I asked what the cone material was and David Cope said it was hemp. I told him to turn it up, acting like I wanted to hear them louder. But secretly, I was hoping he would smoke them. OK. I know that was a realy stupid joke. But I liked it.
