Does anybody have experience with both of these drivers? Is the PSD2002 significantly better than the ASD1001, which costs half as much? What are the differences? HF extension, power handling capacity, lower distortion, etc.?

I think the PSD2002 is a much better device. The ASD1001 is really only good from 2kHz to 10hKz, whereas the PSD2002 is good from 1kHz to 16kHz.

Thanks, that's what I thought.
