Looking forward to the meet in april. SO it looks like we have 2 comparisons lined up:1. Zen versus well tubed paramours2. FE 206 drivers in MLTL & bass reflex boxes2.1. ANother thing i would be interested in is the zen versus zen select, but Phil if you don;t want to do that, we can do it at my or your place some pother time. BTW, guys, after putting a "real" contouring circuit and adjusting the cutoff for the supertweeter i think the full ranges i have are sounding really good now, and would love to have folks come over and hear them now. I can;t move them since everything is unassembled, or i would havbve brought them to the meet. Phil, if you bring the 206, i can bring the zen. -akhilesh

Jim,the easiest is for you to come by and just see it...what you saw was alas, an inappropriate inductor. An appropriate inductor is much more massive. Come by and see it. Let me know what times work for youthanx-akhilesh
