Does anyone know where I can find plans for the "Medallion II" speaker cabinets?

Sure:[http://www.lowther-america.com/Look under cabinets](http://www.lowther-america.com/Look%20under%20cabinets). Tell us how they sound after you get them, compared to other speakers you have heard.-akhilesh

I have been to the Lowther site but they don't actually give the plans for the Medallion. They only show pictures of the kit they sell. Can I find the actual measured drawings anywhere? Thanks.
