I will love to come. Maybe around 3:30?I'll bring my radio shack sound meter and test tones cd, if you want Jim. We can do a frequency sweep and figure out at which placement the the speakers sound best. -akhilesh

Sorry, but Tulsa's a bit too far to drive. Too bad I didn't know you guys before I retired 'cause I was in Tulsa almost every week. For anyone who's interested and hasn't seen this link, it documents the construction process for these speakers.

Building the Fostex FE166E Voigt Pipes

How did the addition of the wings effect the sound of the Voigt Pipes? I would anticipate the baffle step reduction would begin at about half the frequency that it began without the wings.

I didn't hear the speakers before Jim added the extra panels; Perhaps he will comment on the differences. I sure liked your woodworking though! They are beautiful cabinets!
