Hi Guys,I don't usually post about updates to my site on any forums, figure those interested are already on my mailing list. But there was some interest here in my horn work a while back so I thought I would provide a link to something new I added last night. This article deals with back loaded horn response predictions outside the box.http://www.quarter-wave.com/Horns/Advanced_Back_Horn.pdfEnjoy and comments and discussion are always welcome either here or by private e-mail.Martin

Hi Martin,Thanks for posting the link. I read your horn write-up a couple months ago, and as is usual for you, it was well-written and thorough.Good to see you, by the way!Wayne

Good to hear from you again, Martin! YOur horn document looks prtty cool, except I left engineering long enough ago that I just skimmed through it! But it looks to be well thought out!-akhilesh
