Hi all, Found a small stash of "Foster 100k03" drivers. Has anybody any specifications for these? Any experiences with these or suggestions for enclosure welcomed. Thanks Chris  
Foster 100k03

Hi Chris, My experience with Fostex/foster drivers is that they sound very good in a BR box, 1 cubic foot tuned to about 80 Hz, and crossed with a sub at around 90-100 Hz. Also, some of them tend to be very PEAKY / STEPPY over 3000 Hz, in which case you could use an active filter or even put it in a 3-way system. If you put in a 3-way, and use passive components, the tweeter cutoff should be way higher than the mid cutoff. Let us know how you like it! -akhilesh
