Hi all, Found a small stash of "Foster 100k03" drivers. Has anybody any specifications for these? Any experiences with these or suggestions for enclosure welcomed. Thanks Chris Foster 100k03

HI Chris,My esxperience woth Fostex/foster drivers is theat they sound very good in a BR box, 1 cubic foot tuned to about 80 Hz, and crossed with a sub at around 90-100 Hz. Also, some of them tend to be veryPEAKY / STEPPY over 3000 hz, in which case you cold use an active filter or even put it in a 3-way system. IF you put in a 3-way, and use passive components, the tweeter cutoff should be way higher than the mid cutoff. Let us know how you like it! -akhilesh
