---

I need some help based on a pair of speakers I purchased. The cabinets look like Onken style but I am not sure. I am also not sure if they are Altec or Jensen design. They are out of the 50's. Is there a local expert that knows about these designs. If so I would sure like to speak to him/her. I want to see if the cabinet is tuned correctly. I can send pictures of the cabinets. So far I have not been able to find any information on these. Thanks
