Hi Folks, Even though I am not going to get a room at the hotel, I can bring along the DCA drivers in PAWO horn, if there is interest from folk. I'll need some kindly soul to set them up in their room (could be part of the time). So if anyone is coming to LSAF, has a hotel room, please let me know. We'll also need a decent amp & a cdplayer/ipod source: we should be able to rustle those up. The room is the main issue I think...do let me know if anyone can help. -akhilesh

Akhilesh, You are welcome to play them for a few hours in my room, though I'll only have 2 watts or so per channel. Skip

Thanks Skip. Are you demoing something else? I would hate to take away from your stuff, since my motivation is just to let folks hear these, without any commercial interest of course. Let me know if you are demoing something already. -akhilesh

I'll have my Lowther PM2Cs in Medallion II cabinets, the upgraded S.E.X. Amp, and the Squeezebox. Also, I use a passive line-level BSC filter. Over the 2+ days, I don't feel compelled to play them all the time, and I have no commercial involvement in any respect. Skip

OK THanks Skip. Will take you up on it. ! 2 watt amp won;t do it for the DCA 5.5's...they'll need at least a 5 watt, preferably a 20 watt. Let me post & see if anyone at LSAF hasa spare 10-20 watt tube amp they can let us borrow. -akhilesh
