i am having dc gold 9.5r single drivers installed in my car. they will be driven by a custom built car amp based on nelson pass's f2 design. the f2 should extend the bass a little lower and this amp is pure class a, single ended without feedback. ought to be fun.

What are those drivers like? Do you have a website link?

ya, the link is <http://www.dcgoldaudio.com>. Look for the reference versions.
