Fred  I am sending this to you as you are my design guru but hopefully others have some feedback also --- any interest/experience in the spawn family of cabinet design....really like the idea of a "filterless" concept...found a kit builder on audiogon and am hoping they are not crazy expensive....like they are from the guy that sells the speaker in pairs complete....also have seen "concept of the spawns with 2 drivers and a super tweeter too.....JD  (Fred I am the guy that bought your Voigt's in Dallas---using them regularly now that I have Fe168ez's and love them !)
