Today I got my bunch of $.49 full rangers from PE. I made leads for them and put a pair in a box for breakin. The box is stuffed with the stuffing I have around here...fairly tight, but not too tight to tape the boz closed. Sitting about 8 feet away those 2 fifty centers in acompletely closed box are decent enough to listen to.Decent enough for talk radio and blues anyway. I have a speaker switch to 'get out of the box'when I want to.Must be because the cardboard box is thin that the soundcoming through all that is listenable. Seems funny though.
