I would like to get a little info on some line array's that will be used for 2 channel music and also Home theater use. Here are my plan's I am building a home theater room that will be 12' X 20' with 10' ceiling's, seating for six. Infocus projector Onkyo TX-DS 777 AV receiver 2 audiosource amp100 both (bridged) for front L&R 2 audiosource amp100 1(bridged) for center and 1 for surrounds. Plan to upgrade to better amps later. Audiocontrol 7 channel EQ subwoofer 25-100 Hz  
Front L,C,R 160-16k Hz surrounds 150-12k Hz I would like to have 5 matching speakers 2 front L,R Line array's 1 center 2 surrounds Dipole/Bipole For subs I plan to use IB subs (dayton 15") with a 500 watt P.E. amp. Could some one give me some options on some design's or kits. Thanks to all, Clyde
